## **COMPANY PROFILE**

### **Primary Focus:**

Water & Wastewater Treatment Equipment Manufacturer  
& Supplier  
Water & Wastewater Treatment Plants – Turnkey  
Project & Contracts Management

## **CAPABILITY**

The company undertakes, all under one roof, tender preparation; project planning; design; manufacturing; installation; commissioning; successful handover and after sales, of water and waste water treatment plants. This together with our fully equipped maintenance and installation crews make Inenzo Water one of the four runners in this industry on the African continent.

Having specialised in this industry over the years, the company has been in a position to establish a range of water and wastewater treatment equipment designed to fulfil an entire spectrum of needs from the most basic to the most sophisticated equipment available. This is the result of the demand for water treatment equipment, in a country with a growing population and scarce water resources.

## **OVERSEAS SUPPORT**

Inenzo Water's objective is to establish new business relationships to encourage the introduction of new technology from different parts of the world for the design and upgrading of water treatment plants for Southern Africa.

We have at this stage managed to successfully conclude joint venture arrangements and establish agencies with several European companies, where we exclusively fabricate and supply equipment in conjunction with our own designed equipment.

## **MANUFACTURING FACILITY**

We have our own well-equipped manufacturing workshops in Kraaifontein Industria as well as a network of Specialist Manufacturers having the capability to manufacture a wide range of equipment for the water industry.

## **STAFF COMPLIMENT**

Skilled staff number approximately 45 people at our Cape Town office. Our technical skilled staff includes professional engineers, mechanical engineers and qualified artisans.

## **EXPORT BUSINESS**

In the past years we have exported equipment and complete installations in several countries, including Namibia and Angola.

## **MEMBERSHIP OF PROFESSIONAL INSTITUTIONS**

Inenzo Water is a member of the following institutions:

- WISA (The Water Institute of Southern Africa) - membership number 23433

## **QUALITY ASSURANCE**

Further, Inenzo Water works in compliance to ISO 9000 standards and a copy of our Project Quality Plan can be forwarded on request. Inenzo Water is presently considering the planning of the process of qualification in terms of this standard.

## **CONTRACT REFERENCE LIST**

The abbreviated reference list for the Cape Town operation is detailed below followed by the Combined Reference List.

## **PRODUCT RANGE**

| <b>PRODUCT</b>                           | <b>TYPE</b>                                         |
|------------------------------------------|-----------------------------------------------------|
| <b>Potable Water Treatment Equipment</b> | Community drinking water plants                     |
|                                          | Packaged drinking water plants                      |
|                                          | Mobile water treatment packages                     |
|                                          | Low cost housing potable packaged plants            |
| <b>Chemical dosing equipment</b>         | Dry powder feeders                                  |
|                                          | Polyelectrolyte batching and Dosing systems         |
| <b>Leisure Equipment</b>                 | Commercial swimming pool filters                    |
|                                          | Specialized swimming pools                          |
| <b>Industrial water treatment</b>        | Bio-filtration and fish farming                     |
|                                          | Cooling tower filtration plants                     |
|                                          | Ultra filtration                                    |
|                                          | Industrial pressure sand and carbon filters         |
|                                          | Iron removal plants                                 |
| <b>Flow control Systems</b>              | Sluice Gates Penstocks Adjustable Weirs             |
| <b>Screening equipment</b>               | 5 Types of different screening systems              |
| <b>Grit Removal Systems</b>              | Screw Grit Classifiers                              |
|                                          | Spiral Grit Classifiers                             |
|                                          | Air Lift Systems                                    |
|                                          | Pumped Systems                                      |
|                                          | Traveling Bridge Systems                            |
| <b>Clarifiers / Settling Tanks</b>       | Primary Settling Tanks                              |
|                                          | Secondary Settling Tanks                            |
|                                          | Secondary Hydrostatic Lift Settling Tanks           |
|                                          | Dortmund Tanks                                      |
|                                          | Gravity Thickeners                                  |
| <b>Aeration Equipment</b>                | Fixed bridge and Floating Vertical Shaft Aerators   |
|                                          | Fixed bridge and Floating Horizontal Brush Aerators |
|                                          | Fine Bubble Diffuser Systems                        |
|                                          | Submersible Mixer / Aerators (ABS Nopon OKI's)      |
|                                          | HST Turbo Air blowers                               |

| PRODUCT              | TYPE                                           |
|----------------------|------------------------------------------------|
| Mixers               | Vertical Shaft Mixers                          |
| Pumping Equipment    | Archimedes Screw Pumps Standard & Steel Liners |
|                      | Submersible and end suction pumps              |
|                      | Axial Flow pumps                               |
| Conveying Systems    | Centreless and spiral Conveyors                |
|                      | Belt Conveyors                                 |
| Bio-filter equipment | Rotary distributors                            |
|                      | Rotating Biological Contactors                 |
| Sludge Dewatering    | Linear Gravity Belt thickeners                 |
|                      | Belt Filter Presses                            |
|                      | Centrifuges                                    |
